

Pankaj Barmon Nihal

Backend Developer

pankoz.barmon1@gmail.com | +8801521431458 | Dhaka, Bangladesh | [GitHub](#) | [Portfolio](#) | [LinkedIn](#)

Summary

Backend Developer with professional experience building production-ready APIs and server-side systems using Python — primarily Django REST Framework, Django, and FastAPI. Skilled in PostgreSQL/MySQL schema design, real-time WebSocket systems, AWS deployment, CI/CD pipelines, and payment gateway integrations.

Technical Skills

Backend & Frameworks: Django, Django REST Framework, FastAPI

Databases & Cloud: PostgreSQL, MySQL, AWS (EC2, S3), CI/CD Pipelines, Docker

Tools & Integration: REST APIs, JWT/Token Authentication, Background Tasks, Payment Gateways, Push Notifications, RabbitMQ, Git/GitHub, Postman

Languages: Python, JavaScript, Java, C++, C

Frontend: React.js, jQuery, HTML, CSS, Tailwind CSS, Bootstrap

Problem Solving: 550+ problems solved — [LeetCode](#), [HackerRank](#), [Codeforces](#), [CodeChef](#)

Experience

Backend Developer

January 2025 – April 2026

EON System | Dhaka, Bangladesh

Django, FastAPI, PostgreSQL, MySQL, CI/CD, WebSocket, Payment Gateway

- Developed and maintained backend services across Django and FastAPI frameworks in a production environment serving real users.
- Optimized complex database queries using indexing, select_related, and schema normalization, reducing database load and improving response times across concurrent projects.
- Built and documented secure RESTful APIs, integrated third-party payment gateways, configured push notifications, and implemented background jobs and automated task scheduling.
- Implemented real-time features using WebSocket (Django Channels) for live chat, order tracking, and location updates.
- Established CI/CD pipelines on AWS and containerized services with Docker for efficient development and deployment, reducing release friction.

Projects

JobVenue: Job Board Platform

[Live](#) | [Backend](#) | [Frontend](#)

A full-stack job board platform where employers can post jobs and manage applications, and job seekers can search, filter, and apply — with real-time chat built in.

- Built a Django REST Framework backend with JWT authentication and role-based access for employers and job seekers, supporting full job CRUD functionality with filtering and search.
- Implemented real-time live chat between employers and job seekers using WebSocket (Django Channels) with persistent message history stored in PostgreSQL.
- Designed a normalized PostgreSQL schema and optimized queries using select_related and prefetch_related to minimize database hits under load.

Technologies: Django REST Framework, PostgreSQL, WebSocket (Django Channels), React.js

akhonLagbe: E-Commerce Platform

[Live](#) | [Backend](#) | [Frontend](#)

A full-stack e-commerce platform supporting product browsing, cart management, secure checkout, and order processing for end users.

- Developed a Django backend with RESTful APIs for product management, user authentication, cart operations, and order processing.
- Integrated payment gateways for a secure checkout flow, and implemented token-based authentication with session management.
- Optimized database queries with pagination and filtering for product listings, ensuring scalable browsing under load.

Technologies: Django, Django REST Framework, PostgreSQL, React.js

EventHub: Event Management App

[Live](#)

A full-stack event management application where users can create, manage, and attend events with role-based access control — deployed and live.

- Built Django backend with token authentication, role-based access control (RBAC), and full event CRUD operations.
- Optimized database queries with select_related and applied proper indexing for fast event lookups and filtered listing endpoints.
- Designed RESTful API endpoints with validation, permissions, and serializer-level data control; deployed and live on Render.

Technologies: Django, Django REST Framework, PostgreSQL, Tailwind CSS

Education

Jagannath University, Dhaka, Bangladesh

Expected 2026

MSc in Computer Science & Engineering

Achievements

- ICPC Dhaka Regional 2024 Contestant: Competed as a team member in one of the most prestigious collegiate programming competitions globally, solving complex algorithmic problems under time pressure.

Extra Curricular Activities

Active Member | Jagannath University Programming Club (JUPC)

Dhaka, Bangladesh

- Participated in intra-club programming contests and collaborative contest preparation sessions focused on algorithms and data structures.

Contest Analyst & Volunteer | ICT Division — Programming Contest with Risers

Feb – Apr 2024

- Analyzed and validated programming problems for a national-level contest; assisted in organizing the event and coordinating smoothly between all participants and the judging panel.

Languages

Bangla: Native | English: Fluent
